The Coding Manual.....	22
Question by Question Instructions.	24

INTRODUCTION

This year the LIB survey is going into the field during late August together with the LIS and the LIW surveys. The Household, Individual and Proxy questionnaires are on CAPI. All other questionnaires and fieldwork documents are on paper.

The procedures for coding and editing will basically remain the same as last year. You will be checking all of the paper documents, coding verbatim responses output from the CAPI questionnaires and resolving errors where the paper documents and CAPI questionnaires do not match; for example, where ID's have been entered incorrectly or person numbers swapped.

Wave 15 Following Rules (As At Wave 14)

Rule 1 - All people listed in households who were interviewed at Wave 1 are Permanent Sample Members (PSMs), including children under the age of 16. People are eligible for interview if they reach 16 on or before December 1st 2004. Wave 1 PSMs have a PID beginning with '1'. ALL PSMs MUST BE FOLLOWED, INCLUDING CHILDREN YOUNGER THAN 16 AND PEOPLE LIVING WITH THEM. Some people first enumerated after Wave 1 have been defined as PSM, for example the child of a PSM. These people may have a PID beginning with 2, 3 or 4 etc.

Rule 2 - Respondents are divided into Permanent Sample Members (PSMs) and Temporary Sample Members (known as XXXs). All members of a household where any PSM resides are potentially eligible for interview.

Rule 3 - The sample status code for all individuals has been defined in advance of fieldwork and WILL NOT CHANGE DURING FIELDWORK (coversheet page 2).

Rule 4 - XXXs are followed to a new address as long as they have moved with a PSM. XXX split-offs moving without a PSM are not followed to their new address.

Rule 5 - Where feasible follow-up will be attempted for PSMs who move into institutional accommodation.

Rule 6 – Follow-up will only be attempted in Britain. However, any PSM who leaves the country will be subject to normal panel maintenance procedures and will be interviewed on their return to Britain.

Wave 15 Documents

General Design

Date conventions : These have not changed since last year. Year dates are still four digits instead of two digits with 19 pre-printed in front of the date. Where there is no separate 'don't know' code we have four blank boxes which interviewers will have to fill in. This is so they can enter '9998' for 'don't know' and '9999' for refused if necessary. These conventions apply all throughout the questionnaire.

Coversheet : The household grid is still included and must be completed for all persons present in co-operating households regardless of whether they have been interviewed or not. Remember to check the code at question 15 on the outcome of the self-completion questionnaire.

The tracking details are not collected in the Coversheet but are collected as part of the CAPI individual interview.

Address status box - For the issued address there are three codes which are 'code all that apply' so that we can distinguish postcode corrections from other types of corrections. For new addresses there are two codes.

Voucher Type : The split-sample experiment conducted last wave is now complete and the "Voucher Type" code has been removed from the front page of the coversheet. This wave all households will receive the same (higher amount) voucher. An Adult will receive a £10 voucher for a completed interview and a youth will receive £5.

The Movers Form : Reminder: This form should only be completed where new address details **cannot** be found. For all movers where the new address **is** known the interviewer should write this in directly on the Coversheet. This applies to local and non-local moves as well as XXX only split-offs who will not be followed.

Household Questionnaire (CAPI): This should only be completed for co-operating households.

Individual Questionnaire (CAPI): There are some new questions and some rotated questions. Questions about qualifications have been redesigned and simplified.

Self-completion (Paper): completed by all co-operating Individual Questionnaire respondents.

Proxy Questionnaire (CAPI): There are no new questions this year.

Telephone Questionnaire (Paper): There has been a major redesign this wave. The Telephone Questionnaire is much extended and is now divided into the same sections as the Individual Questionnaire. Also contains questions from a much reduced Household Questionnaire

Youth Questionnaire (Paper): There are some new questions this year. Questions about height and weight, and health and Leisure activities and future job choices have been cut and questions about diet, health and drug taking have been added. The Youth Questionnaire is a self-completion booklet as at Wave 14.

QUESTIONNAIRE CHANGES FOR WAVE 15

As last year the Household, Individual and Proxy questionnaires are all on CAPI. The only remaining paper documents are the Coversheet, Self-completion, Telephone, Youth questionnaire and the Untraced Mover's Form.

The Youth Questionnaire for 11 – 15 year olds is a standard self-completion questionnaire, which means that you will have to do a visual edit of the questionnaire before it is punched. To ensure confidentiality for the child within the household, interviewers will have brown envelopes for them to put the questionnaire into before handing it back. While we will ask interviewers to remove the questionnaire from the envelope and attach it to the correct household before mailing back, some will fail to do this.

As last year, there is no Update and Tracking Form, instead of collecting the tracking details in the Coversheet tracking details have now been moved to the end of the 'F' Section of the individual Questionnaire.

The overall content and the format of the questionnaires are similar to last year with some changes.

Coversheet: As last year – with the exception of the removal of the 'voucher type' code. As last year current tracking details are pre-printed on the inside back page of the Coversheet. Changes to tracking details are collected at the end of the Individual Questionnaire. Please code only calls made in person to the 'issued' and 'new' address at cols. 52-53 and 54-55.

Movers Form : Same as at Wave 14. No changes.

Showcards: We have changed the numbering system used on the showcards. Numbering this year is sequential - running from 'Showcard 1' through to 'Showcard 75'. This system replaces our old practice of using a section letter (i.e. D for Demographics, J for Job History) followed by the showcard number within that section (i.e. Showcards D1, M1, E1, J1, V1, F1).

Household Questionnaire: As last year – no changes.

Telephone Questionnaire: As there has been a steady increase in the number of telephone interviews over the last few waves a new, extended, version of the Telephone interview has been designed and pre-tested. The

format of the revised Telephone Questionnaire combines that of both a shortened Household Questionnaire, and a much reduced Individual Questionnaire. The Telephone Questionnaire is now divided into eight sections: H (Household) D (Demographics), M (Medical), E (Employment), J (Job History), V (Values and Opinions), and H (Household Finances). Also included is a Household Grid identical to that in the Coversheet. Both the Household Grid and Section H of the Telephone Questionnaire must be completed once only per household (preferably by the HRP or their spouse/partner). All previous visual editing and coding practices remain in operation, i.e. please continue to transfer details collected within the Telephone Questionnaire Household Grid onto the Coversheet Household Grid before sending the coversheet and Telephone Questionnaire for punching.

While many of the questions asked within the Telephone Questionnaire correspond exactly with questions asked within the Household and Individual Questionnaires, the numbering of these questions is inconsistent with either questionnaire. The revised Telephone Questionnaire also contains new questions not included within other questionnaires.

This wave we also wish to differentiate between converters. We are changing the Interviewer Number procedure for phone interviews on the coversheet from 'PHONE1' to 'PHONE1' and 'PHONE2'.

Individual Questionnaire: The main change for this wave is the inclusion of the 'wealth, assets and debts' questions last carried at Wave 10.

Demographics

Collection of data regarding education and qualifications have been revised and shortened for this wave.

D30 is a showcard question on national identity. There are three separate showcards. The use of the correct showcard is dependant on where the interview is conducted (England, Scotland or Wales).

Last year's questions on newspaper readership and the political affiliation of newspapers have been removed.

Health

Last year's SF36 health questions (M4 to M13) on physical exercise and activities, health problems affecting daily life, emotional problems have been replaced by the standard health questions on the limits that health places on daily life. Last year's questions on height and weight have been removed.

Employment

E10a E81a New MRS social class question included

Social Grade Social Status Occupation

A Upper middle class Higher managerial/administrative/ professional

B Middle class Intermediate managerial/administrative/ professional

C1 Lower middle class Supervisory or clerical and junior managerial / administrative / professional

C2 Skilled working class Skilled manual workers

D Working class Semi and unskilled manual workers

E49 to E54 Questions covering membership and payment into an employer pension scheme.

Last year's question on work related stress is removed.

Last year's questions on reasons for having employment are removed.

Job History

No changes

Values and Opinions

V1: Rotated question on views of Britain / UK today last carried at Wave 12.

V10 to V12 Questions on views of 'social class' replace last year's questions on political affiliation.

V13 to V15 Questions on social participation replace last year's questions on leisure activities and religious belief.

Household Finances

For the first time we are using a complex series of checks to prepare for the introduction of Dependent Interviewing techniques in Wave 16 with the aim of minimising the under-reporting of various types of benefit receipt. The CAPI script will check to see if basic eligibility conditions are met and prompt should the appropriate benefit have not reported its receipt in the payments section. Thus the CAPI script will prompt interviewers to ask about State Retirement Pension for those over statutory retirement age who did not report receiving

State Retirement Pension. Similarly CAPI will check for receipt of Pension Credit, disability benefits, Income Support and JSA, Child Benefit and Housing Benefit.

F15 to F25 Repeat of Wave 10 questions about savings and investments held in sole or joint names.

F35 to F43a Repeat of Wave 11 questions on expected pension income on retirement

F43b Code to MRS social class

F53 to F65 Repeat of Wave 10 questions regarding personal debt. These questions include credit and store cards, bank or student loans, catalogue or mail order purchase agreements, and repayment habits.

F72 verbatim question about the world in which our children will grow up.

F75 to F80: Stable contact name questions as at Wave 14.

BOOKING-IN INSTRUCTIONS FOR COMPLETELY AND PARTIALLY CO-OPERATING HOUSEHOLDS

The aim of these procedures is to ensure that all expected questionnaire documents are physically present and reliably labelled and to ensure that critical information is present and correct on the Coversheet.

The documents which are present should correspond to the interview outcomes on the Coversheet. If documents are not present but the interview outcome suggests they should be present, this must be queried with the interviewer.

Household ID numbers and Person Numbers must be correct for all questionnaire documents. Sex and date of birth must be present and consistent on all documents. The Coversheet information must be complete. The identification of previously enumerated and interviewed sample members and those new to the study must be correct on the Coversheet Enumeration Grid.

Reminder: The Household Grid forms part of the Coversheet and should only be completed for co-operating Households. The Enumeration Grid and the Household Grid continue to allow up to 15 people per household.

Please circle the appropriate codes on the **VISUAL EDIT FORM (on the back of the Coversheet)** as you check the documents.

Household-Level Document Checks (All Present And Complete?)

Verify that the **Coversheet** is present for each household, even if non-response or ineligible.

SERIAL NUMBER: Check that all parts of the household ID number are correctly and clearly entered on new Coversheets created by interviewers. Where there has been a partial household move, the household number should be incremented from 0 to 1 for the first split-off household, from 1 to 2 for the second split-off household and so on. The check digit for split-offs should have been written in by interviewers as the CAPI programme provides this for them. If it missing it must be correctly assigned.

NEW ADDRESSES: Check that issued address details have been correctly transferred onto new Coversheets created by interviewers. If there are any moves out of the country or the address is unknown a **Mover's Form** should be present. Coversheets should be created for all split-off movers, even XXX split-offs who have become ineligible for interview this wave.

ADDRESS STATUS: If a household is still at the issued address and corrections have been made to the postcode this should be coded '2' at col 29 and the new postcode should be entered into the boxes provided, **then punched into the booking-in program**. If the postcode is missing for new addresses, flag with a yellow post-it. The postcode is punched as it is used for geographical coding on the survey database. For the rare cases where the postcode is not 4 + 3 digits, for the first four boxes left justify when only 2 or 3 digits. For the second three boxes, right justify if less than 3 digits. If any other corrections have been made to the address '3' should be coded at col 30. If the household is at a known new address they should be coded '1' at col 31, but if the new address is not known or is an out-of-scope address use code '2' at col 31. If no corrections are required '1' should be coded at col 28. Please ensure there is a code for all households, including household refusals, non contacts etc.

INTERVIEWER AREAS: Check that the issued interviewer area number, actual area number, interviewer name and number have all been completed. In most cases the area number will be the same in both boxes. In the case of re-issues from another area the issued interviewer area will belong to the first

interviewer and another area number will be entered in the boxes for 'actual interviewer area'.

Where a telephone interview is achieved during refusal conversion or tracking ISER Staff will determine the Interviewer Number needed for punching. For this wave the Interviewer Number will change to either 'PHONE1' or 'PHONE2. This change will also include 'Area 398' Coversheets which are not issued to NOP field interviewers.

There are two situations where the Actual Interviewer Area will be '300' and the Interviewer Number '0's:

- 1) In cases where a Coversheet is not re-issued during fieldwork as a new address cannot be traced,
- 2) Where a split-off Coversheet with only XXX's resident is created.

IN ALL OTHER CASES, INCLUDING REFUSALS, enter the Actual Interviewer Area and Interviewer Number of the interviewer who attempted the contact.

NUMBER OF CALLS: Check that the number of calls entered in boxes for address on label and any new addresses are consistent with the call record. If the interview(s) takes place at the 'Issued Address' pre-printed on the label, the total number of calls will be recorded at cols 54-55 and blank at cols 56-57. If there is a 'New Address', i.e. code 1 at col 31, the number of calls entered in the boxes at cols 56-57 should be consistent with the information entered in the call record. If no calls are made at a new address, leave the boxes blank. **Please code personal calls only and not those made by telephone.** If a mover is interviewed at an old address (i.e. parental home) record the number of calls at new address as 00. If no calls made at issued address and calls only made to new address enter 00 at cols 54-55. **MAKE ANY CORRECTIONS WHERE NECESSARY.**

COVERSHEET, PAGE 8: Check that column 21 (Question 1) is code 1 only if the interviewer has written in details of difficult to find addresses, or information relevant to re-contacting the respondent(s) next year, for example "behind Eccles Estate in cul-de-sac", "don't call on Sunday", or "respondent is slightly deaf/blind" etc. **CHANGE CODE TO 2 IF INTERVIEWER HAS PUT**

COMMENTS SUCH AS "nice family", "might move", "probably staying", "just got a new dog" etc.

HOUSEHOLD OUTCOMES: Check the final household outcome is consistent with the individual interview outcome at question 14 OR 19. Only if question 14 or 19 is code 1 for every resident eligible member (i.e. aged 16 or over) should household outcome be code 10 'completely co-operating'. If any codes 2, 3 or 4 at question 14 or 19, household outcome is partially co-operating, code 11, 12 or 13 as required. **NB** This is based on **current** household membership excluding movers and persons who have died.

For non-interviewed households check that Questions 4, 5 and 6 are correctly coded. For question 5 the household grid would only be 1 'yes' at col 26 if the interviewer managed to ask the respondent the relevant questions. If codes 21 to 40 at Question 6, reasons for refusal should be written in below. Pass all refusals to Institute staff for decisions on re-issues.

CONVERSION / RE-ISSUE HOUSEHOLD OUTCOME: Check that this is complete and correct in all cases where a refusal conversion was attempted i.e. where col 35 on page 10 is coded '1'.

Conversion/re-issue information, page 9, cols 35-36: Institute staff to code col 35 for all households, codes 21-40 at Question 6, page 8. Any refusal household re-issued to field code '1' at col 36. If not re-issued to field code '2'

OFFICE USE ONLY BOX, page 9. Coversheet issued to field. col 44: All household '0's issued to field will be code '1'. All split-off Coversheets created during field where contact is attempted will be code '1'. **Households can never become a code '2' or '3' during fieldwork.** Codes '4' and '5' will be assigned during fieldwork as required. Code '4' applies to any split-off XXX-only household which has become ineligible for interview. Code '5' applies to any other split-off household NOT issued to field, e.g. untraced movers, out-of-scope. For all codes '4' and '5' the Actual Interviewer Area will be '300' and the Interviewer Number '0's on the front page of the Coversheet.

Progress code, col 45: This should be updated as necessary throughout fieldwork, until the household is finally completed when it is coded '1'.

Re-issue details, col 46-62: This information must be completed for any coversheet that is re-issued back into the field. **The information must also be punched into the booking in program.**

NEW COVERSHEETS CREATED BY INTERVIEWERS

Check to make sure that where a new Coversheet has been created by the interviewer for a split-off household, i.e. where one or more members of the original household has moved locally to a new household and been traced by the interviewer, the household number is not 0 and the check digit has been left blank. **CORRECT AS NECESSARY.**

For all split-off households traced by interviewers, two addresses should be entered on the front page of the new Coversheet - all information from the pre-printed issued address including the Wave 14 FID and full details of the new address of interview. If any information is incomplete and cannot be reconstructed, flag with a yellow post-it and alert your supervisor.

Check that **all** pre-printed information about the listed members who have moved to the new address has been transcribed to questions 2 to 8 in the Enumeration Grid on page 2 of the new Coversheet.

Interviewers should **not** transfer the Person Numbers from the original household Coversheet to the split-off Coversheet. Interviewers should simply start listing at person 01 and continue in sequence until all current household members are listed.

NB: On all newly created coversheets an existing sample member, either PSM or XXX should be listed as person 01. CORRECT AS NECESSARY

INDIVIDUAL-LEVEL CHECKING ON THE COVERSHEET

ENUMERATION GRID

Questions 3 - 8: Leave questions 3, 6, 7 and 8 blank for unlisted joiners except if they are a rejoiner i.e. a sample member we know about moving back in.

Question 9: Check that household membership has been correctly coded. Any person who appears on the pre-printed label must be a listed member and will have a code of 1, 2, 3 or 4. All unlisted members entered by the interviewer will have a code 5, 6 or 7.

Rejoiners: In the small number of cases where a respondent who has been enumerated at previous waves has rejoined the household they are coded 5 at qu 9. It is important these individuals are not confused with those **never** enumerated at a previous wave. If a previously enumerated member rejoins a household their PID, sex, date of birth, interview status codes and sample status code **must** be entered at questions 3 - 8 (col 21-41). In cases where the interviewer does not have this information to transfer from another label they have been issued, they **must** contact Essex to obtain the correct details. In all cases of previously enumerated members rejoining a household i.e. anyone coded 5 at qu 9, page 3, their details **must be checked** with the issued label information held at Essex.

In a few cases you may find a 'retired rejoiner'. These are people we have withdrawn permanently from the sample as we never expect to see them again but who reappear in a sample household. Please check the listing of 'retired sample members'. Code '8' at qu 9. Obtain sample status code and whether ever interviewed information from the Research Centre if necessary. Questions 3 - 8 on the enumeration grid must be completed for these cases.

Check to make sure all boxes for questions 9 through 15 have a code value if there is any sort of interview.

Check that **interview outcome** recorded at Question 14 is consistent with the documents received. Codes '01' to '11' should be used in all cases where the interviewer has made contact with the household and established who is resident even if no interviews are achieved. Code '11' applies when all PSMs

have moved away from the issued household '0' leaving only ineligible XXXs behind. In these cases the PSM movers should appear on a split-off coversheet. Codes '13 to '15' should be used only in cases of complete non-contact i.e., the interviewer has recorded no information about the current household at questions 9 to 13. Code '15' 'Ineligible XXX split-off' applies only to cases where the XXX mover(s) has moved without any PSMs. **This applies to adults only. Children are coded '14' regardless of their status as XXX or PSM.**

Question 15: Check the code here and ensure that the Self-Completion Questionnaire is attached for each code 1.

Question 16: Check that 'Voucher Confirmation' is completed.

Question 17 For all **within-household refusals/non-contacts** i.e. codes 3, 4, 9 or 10 at qu 14, the reason for the refusal/non-contact must be coded here. If it is not, flag it and the interviewer will be approached for further details. Note this includes youth refusals/non-contacts.

Question 18 To be completed by Institute staff only if respondent is a within-household refuser. A youth can also be a within-household refuser.

Question 19 To be coded where any conversion has been attempted or refusals have been re-issued to field. These may be either within household refusals or whole household refusals. A final interview outcome must be coded for all those listed on page 2 of the coversheet even if no conversion is achieved.

HOUSEHOLD GRID

Look at questions 9 - 14, pages 3 - 4 of the Coversheet and check that all current household members are listed on the Household Grid. **IT IS ESSENTIAL THAT THEIR COVERSHEET PERSON NUMBER IS RETAINED AND CORRECTLY TRANSFERRED TO THE HOUSEHOLD GRID and to all other individual level documents. NB** This might mean the numbers on the Household Grid do not run in sequence. They could, for instance, go something like 02, 03, 05 if Person Numbers 01 and 04 on the issued coversheet have left the household

Check to make sure that all boxes 3 - 13 have a code value.

The HRP has to be correct according to the HRP definition. Note that the **HRP is not necessarily line 01**. This means that the relationship column can easily be corrected. Please note that the first person on the list must always be a PSM or XXX (transferred from the coversheet). An unlisted member must never be the first person recorded on the household grid.

If the owner/tenant of the accommodation is no longer a household member (e.g., husband moved out), the next logical person should be coded as the HRP. The HRP has to be a current household member.

3. SEX: Replace 8's and blanks if this information is known elsewhere.

4. DATE OF BIRTH: Replace 98's and blanks if this information is known elsewhere.

5-6 PRE-PRINTED DoB and SEX SAME: Check that the information coded matches the pre-printed information on the Coversheet. If an interviewer has had to make up a new coversheet and transfer the details, assume that they have transferred this correctly and check against this.

7-10. If aged under 16 ensure 8 - 10 are coded 0, 00 and 0.

8 MARITAL STATUS: If two persons are divorced and are only in the same living accommodation for financial reasons, code relationship as other (we have no code for ex-spouse) and code spouse/partner number as 00.

Marital status in the grid is marital status **within the household**. Two divorced people living together as a couple, should be coded as 'living as couple.' Marital status in the individual questionnaire is the person's **legal marital status**. Thus these two items may be inconsistent. Leave marital status as is self-reported by respondent, with the following exception: Married couples and persons living as a couple must be properly coded as such in the grid.

Still count as married those persons whose spouse is absent (even cases where the spouse is living in another country or an institution.) Count as separated cases where a spouse lives outside the household to allow the

other spouse to claim benefits (because they have an agreement to live apart).

10 PAID EMPLOY: Leave as reported, even if this is inconsistent with the Individual Questionnaire.

11-12 FATHER/MOTHER NO: If interviewer has specifically put in '00' for mother or father number but this seems to conflict with what is written in under relationship, do not change the mother/father number columns. These take precedence over the written in relationship and at a later stage will be used to fix relationship. Don't fix relationship. Go with self report. If missing and can easily be reconstructed, do so.

13 RESP ADULT: Check that the responsible adult has been coded correctly. In most circumstances the responsible adult is the mother of the children. If someone is a step-mother, who is married to the child's father, they may still be the responsible adult. However if a couple are cohabiting and the woman is not the child's natural mother she is not necessarily the responsible adult. In this case (and if there is no mother present at all) the father can be the responsible adult.

Persons who will turn 16 during the fieldwork i.e., on or before December 1st 2004 are interviewed. In the grid they should be treated according to their age at the date of interview i.e. if under 16 items 8 - 10 are entered as 00's and they will have a responsible adult.

Circle appropriate check code on VISUAL EDIT FORM on Coversheet.

CHECKING THE CONSISTENCY OF SEX AND DATE OF BIRTH

Verify that the documents labelled for each person are really for that person. Make sure that **sex** and **date of birth** in the individual documents **are consistent** with each other and with the information listed for the person in the Enumeration Grid and the Household Grid. Replace 98's and blanks in the Household Grid if this information is known elsewhere. If birth dates are **not** consistent between documents and there is a marginal comment explaining which is the correct date, correct as necessary. If birth dates are **not** consistent between documents and there is **no** marginal comment explaining which is the correct date, alert your supervisor.

NB Date of birth is D11 on the individual questionnaire, back page on the self-completion, and P4 on the proxy questionnaire. If the reason for any inconsistency between documents is not obvious, don't make any changes.

If you have had to make corrections to the sex and date of birth information on the **self-completion questionnaire** do not code this as codes '2' or '3' (editor corrected/can't be reconstructed). These codes should be used only when corrections need to be made in other documents.

Check the consistency of questions 5 and 6 on the **Household Grid** with the pre-printed information on the **Coversheet Enumeration Grid**. If questions 5 or 6 are code 1 'Yes' the information entered on the Household Grid must be consistent with the information entered on the Coversheet Enumeration Grid and the date of birth with the Individual and Self-completion questionnaires. **CORRECT AS NECESSARY.**

BOOKING-IN INSTRUCTIONS FOR COMPLETE NON-RESPONSE HOUSEHOLDS

Check that the **final household outcome**, Coversheet page 8, is correctly filled out and completed. If codes 21, 30, 31, 32, 33, or 40 are circled, the appropriate sections on page 9 of the Coversheet need to be completed. These sections should **not** be completed for other outcomes. **CORRECT AS NECESSARY**

Where the household has not been enumerated and a household level outcome only is recorded e.g. whole household refusal/ non-contact/ no trace/ only XXXs resident etc., Interview Outcome at qu 14, page 4 of the Coversheet should be coded 13, 14 or 15 as appropriate.

If you find an interviewer is making significant errors on the Coversheet or Household Grid, or any other paper documents, they should be informed as soon as possible. A copy of all comments fed back to interviewers should be kept for reference.

EDITING PROCEDURES**HOUSEHOLD and INDIVIDUAL QUESTIONNAIRES**

If there are mismatches between IDs, PNOs, sex or date of birth of the respondent(s) between the CAPI data and the paper documents, the CAPI data management system will generate an error. You will have to check and resolve these errors, make the appropriate decision and edit the CAPI data accordingly.

INDIVIDUAL QUESTIONNAIRE

If the Interviewer Checks on the front pages of the Individual Questionnaire are NOT consistent with information on the Coversheet Enumeration Grid and the Household Grid, the CAPI data management system will generate an error. Where an interviewer has transferred the key check codes incorrectly and therefore followed the wrong routing through the questionnaire, you will send them a paper version of the questions which they have missed so that the data can be collected. This will then need to be edited into the CAPI data files.

Tracking details are collected at the end of the Individual Questionnaire before the Interviewer Observations. The tracking contact should be someone outside of the household.

SELF-COMPLETION FORM

Back page Sex: Replace blanks, if this information is known elsewhere.

Back page Date of Birth: Replace blanks, if this information is known elsewhere.

TELEPHONE QUESTIONNAIRE

Check household grid.

Coversheet front page, Interviewer No = PHONEI (phonei)

Check IDs correct.

Do not make separate listings sheet for any 'other' listings not elsewhere specified.

YOUTH QUESTIONNAIRE

Ensure that date of birth, sex and person number are consistent with information on the Household Grid.

Check that only one box is ticked per question. If more than one box is ticked remove extra ticks at random. If a child has written in 'don't know' code = 8, 98 as appropriate.

Coding of occupation and industry

All occupations are coded to six digits using CASOC.

All industry codes are four digit SIC (1992).

Instructions for using CASOC coding

This year we will be using the same conventions as for Wave 14 for the CASOC IDs. We need to use all five digits of the serial number so we can identify each sample. As the maximum key length is 12 it is necessary to lose a digit from elsewhere. The question numbers require 4 characters so we will use a single character person number, rather than 2 digit. In the unlikely event of persons 10, 11 or 12 requiring a code they should be entered as follows:

PNO 10 code as 'a'
11 code as 'b'
12 code as 'c'
13 code as 'd'
14 code as 'e'
15 code as 'f'

NOTE: A SEPARATE CASOC FILE FOR EACH BOX WILL BE CREATED SO THAT THEY CAN BE BATCH DELIVERED.

For each individual with occupational information:

Enter the household ID and person number for the first item coded only.

For each subsequent entry for that individual, enter the standardised question number only i.e. E5 becomes E005, D36 becomes D036 etc.

When you start coding items for the next individual remember to enter their full ID and person number on the first entry.

So for each individual's **first occupation coded:**

1. Use the full 5 digit household serial number, household number and check digit but drop the wave number.
2. Add the person number (one digit only)
3. Add the question number standardised to four digits as detailed.

The **first entry** for each individual will therefore use the **full twelve digit** range allowed.

For **each subsequent entry** for that individual enter the standardised question number only.

CODING OF 'OTHER' TIME PERIODS

Coding will need to be done on items where a non-standard period of time is associated with an amount variable and is coded 'other'. These are found throughout the Household and Individual Questionnaires as separately detailed above.

The number of **weeks** should be calculated as demonstrated:

Multiply number of months x 4.33 and round the result, e.g.,

1 day	=	2 weeks
2 months	=	9 weeks
3 months	=	13 weeks
Quarter	=	13 weeks (applies on Individual Questionnaire only)
4 months	=	17 weeks
year	=	52 weeks

If the time period is **less than one week** code the appropriate fraction of a week as follows.

1 day	=	.2 of a week	code 0 0 2
2 days	=	.4 of a week	code 0 0 4
3 days	=	.6 of a week	code 0 0 6
4 days	=	.8 of a week	code 0 0 8

If the time period is **1 - 9 weeks** it should be coded as;

1 week	code 0 1 0
1½ weeks	code 0 1 5
2 weeks	code 0 2 0
3 weeks	code 0 3 0 etc.

If the time period is **10 weeks or more** it should be entered as;

10 weeks	code 1 0 0
11 weeks	code 1 1 0
12 weeks	code 1 2 0 etc.

One-off or lump sum = 666

Time period for pay received given in hours only = 777

D25 Where born**IF IN UK****For England, Wales, and Scotland: CODE TO LOCAL AUTHORITY DISTRICT**

1. Look up place name in appropriate OPCS volume (Census 1981: Index of Place Names, Index of Scottish Place Names).
2. Get district name. In most cases, there will be a one-to-one correspondence between the given town/county and the district making this an easy step.
 - a. If same town/county is listed against more than one district, choose the first district listed, e.g. New Brinsley, Nottinghamshire is part of two districts (Ashfield and Broxtowe), since Ashfield is listed first, choose Ashfield.
 - b. If no district name is listed, check to see whether the description code is a D or LB. The D indicates that the town is a district in and of itself and thus the town name is the district name, e.g. Bristol. LB indicates that the town is a London borough. Again the town name is the equivalent of the "district name," e.g. Hammersmith.
 - c. If a town/county is listed as a UA (Urban Area) it will not have a district name associated with it. Look for an additional listing which does have a district name, e.g. Brixworth, Northamptonshire is listed as a UA and as a Pa (parish). The parish is in the district of Daventry. Choose Daventry.
 - d. If a town/county is listed as a US (Urban Area Sub-division) ignore this line of data. Look for the same town/county as another listing. The other listing may use a more detailed name, e.g. Chorleywood is listed as a US in Buckinghamshire, the closest alternative is Chorleywood West (a locality in Buckinghamshire in the district of Chiltern); Broadstairs, Kent is a US, use the listing for Broadstairs and St. Peters, Kent a parish in the district of Thanet.
3. Once you have the district name, look it up in the alphabetical or county-order lists provided in Appendices A & B.

4. Use the four-digit code (two numerals, two letters) specified in the Appendices. In cases where only partial information is known, use two numerals followed by two blanks, e.g. London not otherwise specified = code 01___. In cases where you are also unable to ascertain the correct county, code as 9999.
